Full Stack Developer with 3+ years of experience building and modernizing production-grade **web, mobile, backend, and agentic AI** solutions across healthcare, enterprise, and client analytics platforms.

Experience

Full Stack Developer Jul 2023 – Present
Argusoft *Gandhinagar, India*

Agentic AI Client-Signal Platform

- Built a client-risk analytics platform using **React, TypeScript, NestJS, PostgreSQL, and WebSockets**, enabling teams to investigate customer sentiment and operational issues through trends, service performance, CSAT, NPS, and ticket data.
- Developed risk analytics covering historical trends, client findings, behavioural signals, driver contribution, service-line performance, **CSAT, NPS**, and ticket volume to support proactive account management.
- Built a reliable end-to-end client-data ingestion workflow that enables teams to upload, validate, resolve, and process data through controlled review checkpoints with resilient recovery mechanisms, reducing manual intervention and ensuring accurate, traceable inputs for downstream risk analytics.

Big Four Audit Firm

- Migrated **25+ frontend modules from Vue 2 to Vue 3** using the Composition API; resolved dashboard and object-management defects affecting everyday enterprise workflows.
- Migrated core microservices from **.NET 8 to .NET 10** and developed REST APIs using **Node.js and SQL Server**, with parameterized queries to protect database access.
- Contributed to reliable application delivery by supporting **Azure DevOps CI/CD pipelines** that automated build, validation, and deployment workflows across multiple environments.
- Automated database and storage maintenance with an **index-rebuild cron job** and unused SFTP dataset cleanup during environment deletion, improving query performance and reducing storage costs.
- Expanded frontend test coverage to **90%** by developing and maintaining **Vitest unit tests across 1,200+ files**, strengthening regression protection and reducing manual validation effort.
- Improved database security by implementing application-level database roles, reducing dependency on the **db_owner** role while preserving required application functionality.

TriageStat Mobile Application – Healthcare Product

- Developed **React Native** workflows for a healthcare communication application used by **500+ healthcare professionals**, enabling doctors, nurses, and hospital teams to capture, manage, and share clinical information for care coordination.
- Implemented push notifications and **WebRTC video calling on Android 8–16**, enabling calls from open, background, and locked-screen states while resolving iOS compatibility, permission, media, and call-handling issues.
- Modernized the application by migrating class components to functional components and upgrading **Expo SDK 50 to 53**; resolved dependency and native-configuration issues, validated Android builds, and supported production APK releases and service deployments.

Technical Skills

Mobile Application: React Native, Expo, Android, iOS
Frontend: React, Vue.js, JavaScript, TypeScript, HTML, CSS
Backend: Node.js, Express.js, NestJS, .NET, WebSockets, REST APIs
Database: PostgreSQL, SQL Server, SQL, Database Performance Optimization
DevOps & Deployment: Azure, Docker, Vercel, Render, GitLab, Git/GitHub, CI/CD
Testing: Jest, Vitest, Cypress, Unit Testing, End-to-End Testing, Test Automation

Personal Projects

Bilingual Full-Stack Platform and CMS | *React, TypeScript, Node.js, PostgreSQL*

- Built a production-ready bilingual platform and CMS with **React, TypeScript, Node.js, and PostgreSQL**, using multi-host routing to isolate public traffic from admin management.
- Designed an **agentic AI framework** with permission governance and human-in-the-loop review; implemented **B-tree indexes for sub-millisecond queries**.

Skillnora – Intelligent Learning Platform | *Groq LLaMA, RBAC, Webhooks*

- Built activity-based recommendations and **AI-generated assessments**, helping learners discover relevant material and practise through structured tests along with timed assessments, answer auto-save, proctoring controls, and rank analytics, alongside role-based access and webhook verification.

Education

Sagar Institute of Research and Technology (SIRTS) Bhopal, India
B.Tech in Computer Science | Grade: 8.23 *Jul 2023 – May 2023*
