Full-Stack and React Native Developer with 3+ years of experience building production web, mobile, backend, and AI-enabled applications across healthcare, enterprise, and client analytics domains

Experience

Solution Analyst (Full Stack Developer)

Argusoft, Gandhinagar, India *July 2025 – Present*

Agentic AI Client-Signal Platform

- Engineered a client-risk analytics platform with **React, TypeScript, NestJS, PostgreSQL, and WebSockets**, giving account teams a unified view of customer sentiment, service performance, CSAT, NPS, ticket volume, and operational trends.
- Architected an auditable LangGraph-powered conversational assistant streaming over WebSockets, pairing LLM synthesis with deterministic evidence citations to eliminate hallucinations and give teams **100%** verifiable risk explanations.
- Established an end-to-end client-data ingestion workflow for uploading, validating, resolving, and processing client data, minimizing manual intervention by **40%** and improving input traceability across downstream risk analytics.

Enterprise Audit Platform (Big Four Client)

- Migrated **25+ frontend modules from Vue 2 to Vue 3** using the Composition API; resolved dashboard and object-management defects affecting everyday enterprise workflows.
- Migrated core microservices from **.NET 8 to .NET 10** and developed REST APIs using **Node.js and SQL Server**, with parameterized queries to protect database access.
- Contributed to reliable application delivery by supporting **Azure DevOps CI/CD pipelines** that automated build, validation, and deployment workflows across multiple environments.
- Automated database and storage maintenance with an **index-rebuild cron job** and unused SFTP dataset cleanup during environment deletion, improving query performance and reducing storage costs.
- Strengthened frontend quality by achieving **90% test coverage** with **Vitest across 1,200+ files**, improving regression protection and streamlining validation efforts.
- Improved database security by implementing application-level database roles, reducing dependency on the **db owner** role while preserving required application functionality.

Programmer Analyst

Argusoft, Gandhinagar, India *July 2023 – June 2025*

TriageStat Mobile Application – Healthcare Product

- Delivered **React Native** workflows for a healthcare communication application used by **500+ healthcare professionals**, helping clinical teams capture, manage, and share information for care coordination.
- Integrated push notifications and **WebRTC video calling on Android 8–16**, enabling calls from open, background, and locked-screen states while resolving iOS compatibility, permission, media, and call-handling issues.
- Modernized the application by migrating class components to functional components and upgrading **Expo SDK 50 to 53**; resolved native configuration issues, validated Android builds, and supported production releases.

Skills

Mobile Application: React Native, Expo, Android, iOS
Frontend: React, Vue.js, JavaScript, TypeScript, HTML, CSS
Backend: Node.js, Express.js, NestJS, .NET, WebSockets, REST APIs
Database: PostgreSQL, SQL Server, SQL, Database Performance Optimization
DevOps & Deployment: Azure, Docker, Vercel, Render, GitLab, Git/GitHub, CI/CD
Testing: Jest, Vitest, Cypress, Unit Testing, End-to-End Testing, Test Automation

Personal Projects

Bilingual Full-Stack Platform and CMS | *React, TypeScript, Node.js, PostgreSQL*

- Built a production-ready bilingual platform and CMS with **React, TypeScript, Node.js, and PostgreSQL**, using multi-host routing to isolate public traffic from admin management.
- Designed an **agentic AI framework** with permission governance and human-in-the-loop review; implemented **B-tree indexes for sub-millisecond queries**.

Skillnora – Intelligent Learning Platform | *Groq LLaMA, RBAC, Webhooks*

- Created activity-based recommendations and AI-generated assessments, enabling personalized content discovery, structured testing, answer auto-save, proctoring controls, and rank analytics through role-based access and webhook verification.

Education

Sagar Institute of Research and Technology (SIRTS) Bhopal, India
B.Tech in Computer Science | Grade: 8.23 *July 2019 – May 2023*
